

## AquaSurge Pumps

Ideal for use in ponds, pondless waterfalls, and other water feature applications, Aquascape Aqua-Surge asynchronous pumps are designed for use in skimmer and waterfall-filter systems. Extremely energy-efficient, AquaSurge pumps are made for continuous use in either horizontal or vertical orientation.

AquaSurge pumps will not corrode or rust, and their rubber feet prevent noise and vibration while in use, making them a top choice for discriminating homeowners and pond professionals alike. Excellent Energy Efficiency

Aquascape uses asynchronous motor technology in its AquaSurge pumps, providing high torque, trouble-free performance at higher head heights as well as excellent energy efficiency compared to magnetically driven pond pumps. The unique ceramic shaft with cooling port also prevents the pump from overheating.

You'll save hundreds of dollars over traditional water pumps, and its oil-free design helps prevent pond contamination.

Model	Part #	Watts	Max GPH	Gallons per Hour					Shut Off	Cord Length	Outlet
				5'	10'	15'	20'	25'			
AquaSurge 2000	91017	160	2193	1850	1465				12.5'	20'	1-1/2"
